# Diamond 9

1) First, select **any 9 items** from kimyo – they can be from as many different locations as you like

2) Now, you are going to arrange those items as a **Diamond 9**.
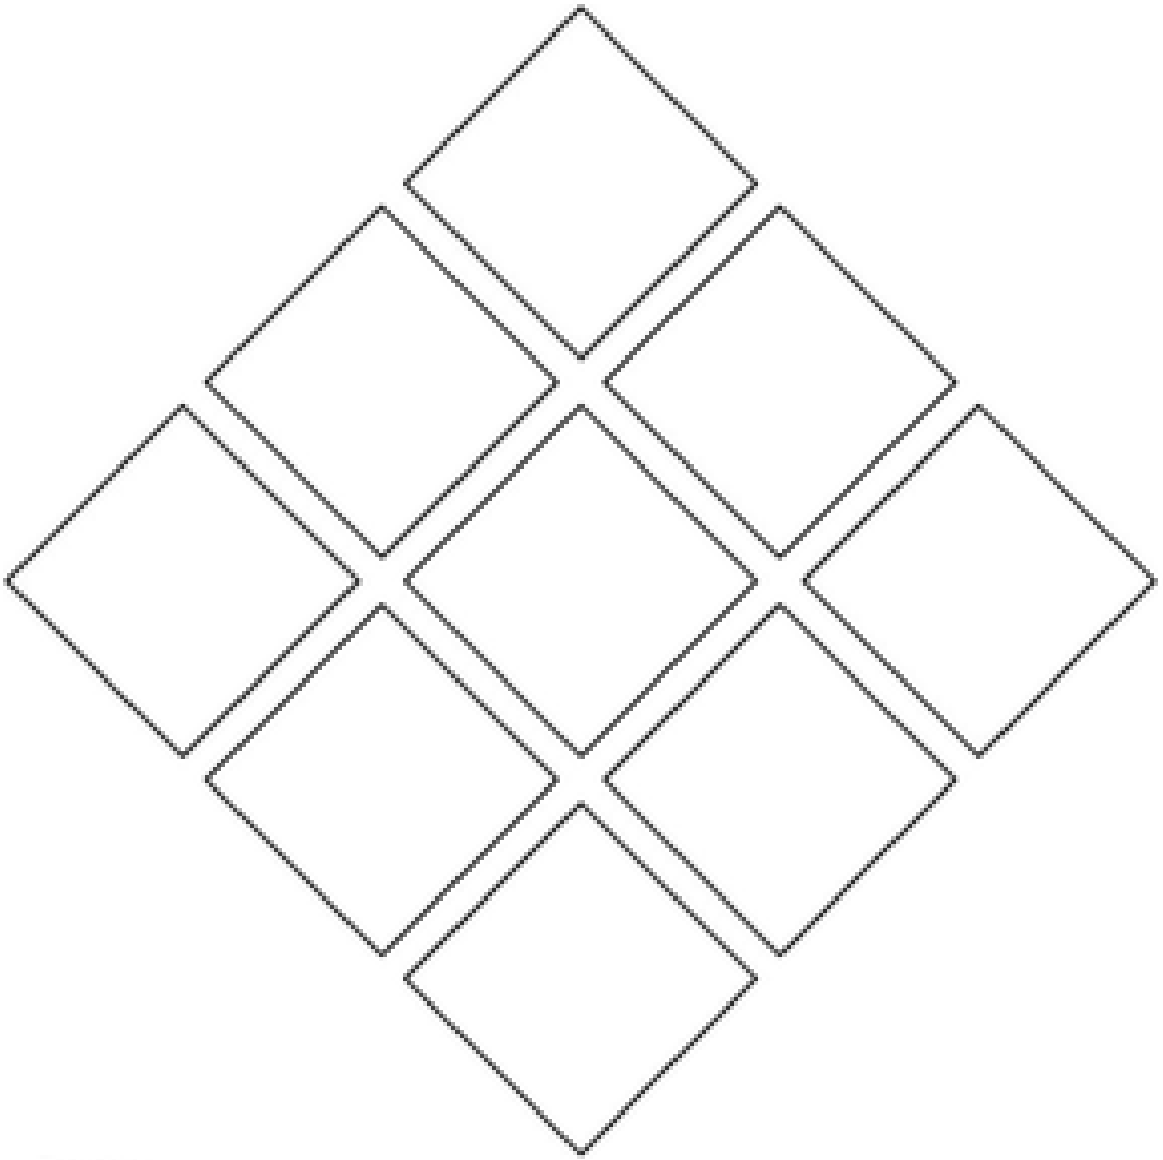

The item that you think is the **most** important will go at the **top** of the diamond, the item that you think is the **least** important will go at the **bottom** of the diamond.

It is up to you to decide what makes an item 'important' – it could be the most interesting, or the most useful, or the most unique…….
Then you can arrange the other items in between.

3) Be ready to give reasons for your top and bottom choices!

Diamond 9

Why is your chosen item the most useful/interesting?

_____

_____

Why is your chosen item the least useful/interesting?

_____

_____
